- Application** : For use in surface waters, sewers and other aggressive environments.
Continuously variable water level regulation for the upstream level.
- Materials** : Slide, frame and rib stainless steel 316L or 304.
EPDM sealing rubber on the rear side of the slide.
- Spindle** : Stainless steel 316 trapezoidal thread Li, pitch 6mm.
- Operation** : Several possibilities see page 7.01.
- Interface** : EPDM compound between overflow slide and wall.
- Mounting** : On concrete with chemical anchor bolts.
On a wooden sheet pile with threaded rods.
- Remarks** : Larger sizes and special shapes can be produced upon request.
